### **Part III DETAILED ACTION**

Claims 1-15 are currently pending.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1,2,7,8,15 drawn to shark cartilage extract and pharmaceutical composition comprising thereof.
- II. Claims 3,4 drawn to method of treatment of hypertension using shark cartilage extract.
- III. Claims 5 drawn to method of treatment of a disease related to excessive PHF using shark cartilage extract.
- IV. Claim 6 drawn to method of treatment of a disease related to intracellular calcium elevation using shark cartilage extract.
- V. Claim 9 drawn to method for counteracting activity of parathyroid hypertensive factor using shark cartilage extract.

Art Unit: 1631

VI. Claim 14, drawn to method for inhibiting vascular smooth muscle proliferation.

VII. Claims 10-13 drawn to method of making shark cartilage extract.

The inventions listed as Groups do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is the technical feature that links Groups I-VII. Group I is not the contribution over the prior art because it is suggested by references teaching shark cartilage extract, such as those reflected in International search Report. Therefore, the lack of unity is present because the linking technical feature is not a "special technical feature" as defined by PCT Rule 13.2.

Inventions I and II-VI are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, methods II-VI are alternate methods of using the product of Group I.

Inventions II-VI are related as independent and/or patentably distinct methods which are not connected in design, operation or effect. These methods have different modes of operation and/or they have different functions or different effects.

Art Unit: 1631

If applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims which depend from or otherwise include all the limitations of the allowable product claim will be rejoined. (MPEP 821.04)

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Borin whose telephone number is (703) 305-4506. Dr. Borin can normally be reached between the hours of 8:30 A.M. to 5:00 P.M. EST Monday to Friday.
